## Our science

### Genomics

LGC's genomics operations are mainly carried out by [LGC Genomics](#). An international genomics company, AGOWA, was acquired by LGC in December 2005.

LGC Genomics has long-standing experience in large-scale sequencing gained in international and national genome projects. Through LGC genomics' custom [DNA sequencing service](#), we offer state-of-the-art technology (ABI 3730 XL), an overnight DNA sequencing service and an [online ordering service](#).

LGC Genomics is constantly extending its range of genomic services, nucleic acid preparations and extraction services.

LGC Genomics' quality management system is certified by DIN EN ISO 9001:2000.
