## Our expertise

### Laboratory management

LGC offers specialised services of establishing and operating purpose-built laboratories on behalf of our customers. We currently operate laboratories on behalf of the MHRA and the BP Commission.

Skilled scientists at LGC work in partnership with individual clients to design, customise and establish a core-facility. All activities are undertaken by dedicated staff and are incorporated into well-established organisational and quality infrastructures. At the same time, they remain totally self-contained with a differentiated customer identity. This approach provides the customer with a fully-flexible, high quality, dedicated facility where they dictate priorities. In addition, clients have ready access to LGC's other

specialist expertise.
