Customers

Customers for LGC's products and services include major international commercial organisations, government laboratories and departments, police services and other not-for-profit bodies.

LGC is the UK's designated National Measurement Institute for chemical and biochemical analysis and is also the host organisation for the UK [Government Chemist](#) function.

LGC's business is focused upon customers in forensic science; pharmaceutical and biotechnology research, development and quality control; food chain and environmental surveillance and safety; life science, genomics, proteomics and basic research.
